Part III Reading Comprehension (45 minutes, 30 points, 1 for each)

Directions: There are 5 passages in this part. Each passage is followed by 6 questions or unfinished statements. For each of them there are 4 choices marked A, B, C and D. Choose the best one and mark the corresponding letter with a single bar across the square brackets on your machine-scoring **ANSWER SHEET**.

Passage One

A 10-year-old boy decided to study judo despite the fact that he had lost his left arm in a terrible car accident. The boy began lessons with an old Japanese judo master, and he was doing well. But he couldn't understand why, after three months of training, the master had taught him only one move.

"Sir," the boy finally said, "shouldn't I be learning more moves?"

"This is the only move you know, but this is the only move you'll ever need to know," the master replied.

Not quite understanding, but believing in his teacher, the boy kept training.

Several months later, the master took the boy to his first tournament (锦标赛).

Surprising himself, the boy easily won his first two matches. The third match proved to be more difficult, but after some time, his opponent became impatient and charged; the boy skillfully used his one move to win the match. Still amazed by his success, the boy was now in the finals.

This time, his opponent was bigger, stronger, and more experienced. For a while, the boy appeared to be overmatched. Concerned that the boy might get hurt, the referee called a time-out. He was about to stop the match when the judo master intervened.

"No," the judo master insisted, "Let him continue."

Soon after the match resumed, his opponent made a critical mistake: he dropped his guard. Instantly, the boy used his move to pin him. The boy had won the match and the tournament. He was the champion.

On the way home, the boy and his judo master reviewed every move in each and every match. Then the boy summoned the courage to ask what was really on his mind.

- "Sir, how did I win the tournament with only one move?"
- "You won for two reasons," the master answered.

"First, you've almost mastered one of the most difficult throws in all of judo. Second, the only known defense for that move is for your opponent to grab your left arm."

- 31. Why did the boy wan to learn judo?
 - A. He wanted to get over the accident.
 - B. He wanted to make up for his disability.
 - C. He wanted to exercise his right arm.
 - D. The reason was not mentioned in the passage.
- 32. When a referee calls a "time-out",
 - A. the time has run out

- B. the game stops for a short time
- C. either side can claim victory
- D. the game ends in a tie
- 33. Why did the master insist on continuing the match?
 - A. He didn't want to give the opponent an advantage.
 - B. The boy was confident of winning.
 - C. He had confidence in the boy's skill.
 - D. All he cared about was winning the final.
- 34. What probably caused the defeat of the boy's opponent in the final?
 - A. Over-confidence
- B. Impatience
- C. Inexperience
- D. Exhaustion
- 35. Why did the master teach the boy only that one move?
 - A. The boy could not do other moves with only one arm.
 - B. It was the only move the master knew well.
 - C. It was the move his opponent would not be good at.
 - D. His opponent would be helpless once he made that move.
- 36. What does the passage mainly tell us?
 - A. Once can turn a weakness into an advantage.
 - B. It is very difficult to have a good teacher.
 - C. Even a disabled person can win a match.
 - D. Practice makes perfect.

Passage Two

My five-year-old daughter knew exactly what she wanted for Christmas of 1977, and told me so. Yes, she still would like the pink-and-green plastic umbrella, books, long nightgown, and slippers-fine. But really, there was only one thing that mattered: a Barbie Townhouse, with all the accessories.

This was a surprise. Rebecca was not Barbie girl, preferred stuffed animals to dolls, and

wasn't drawn to play in a structured environment. Always a make-up-the-rules, design-my-own-world, do-it-my-way kid. Maybe, I thought, the point wasn't Barbie but the house, which she could claim for herself, since we'd already moved five times during her brief life.

Next day, I stopped at the mall. The huge Barbie Townhouse box was there: "3 Floors of High-Styled Fun! Elevator Can Stop on All Floors!" Some Assembly Required. Uh-oh. My track record for assembling things was miserable. Brooklyn-born, I was raised in apartment buildings in a family that didn't build things. A few years earlier, I'd spent one week assembling a six-foot-tall jungle gym from a kit containing so many parts. I spent the first four hours sorting and the last two hours tying to figure out why there were so many pieces. The day after I finished building it, as if to remind me of my limitations, a tornado (龙卷风) touched down close enough to scatter the jungle gym across an acre of field.

I assembled the Barbie Townhouse on Christmas Eve. Making it level, keeping the columns from looking like they'd melted and been refrozen, and getting that elevator to work were almost more than I could manage. And building it in curse-free silence so my daughter would continue sleeping-if, in fact, she was sleeping-added a layer of challenge. By dawn I was done.

Shortly thereafter, my daughter walked into the living room. Her surprise may not be real, but her delight was utterly genuine and moves me to this day, 34 years later. Rebecca had spurred me to do something I didn't think I could do. It was for her, and-like so much of the privilege of being her father-it brought me further outside myself and let me overcome doubts about my capacities.

Passage Three

It is all very well to blame traffic jam, the cost of petrol and the fast pace of modern life, but manners on the roads are becoming deplorable. Everybody knows that the nicest men become monsters behind the wheel. It is all very well, again, to have a tiger in the tank, but to have one in the driver's seat is another matter. You might tolerate the odd road-hog (占道者), but nowadays the well-mannered motorist is the exception to the rule. Perhaps the situation calls for a "Be Kind to Other Drivers" campaign; otherwise it may get completely out of hand.

Road courtesy is not only good manners, but good sense too. It takes the most good-tempered of drivers to resist the temptation to hit back when subjected to uncivilized behavior. A friendly nod to a wave of acknowledgement in response to an act of courtesy helps to create an atmosphere of goodwill and tolerance so necessary in modern traffic conditions. But such acknowledgements of courtesy are all too rare today. Many drivers nowadays don't even seem able to recognize courtesy when they see it.

Contrary to general opinion, young drivers have better manners than their seniors. But this is short-lived in the world of modern driving where many drivers neither expect nor give any mercy. This may be encouraged on the battlefield but is out of place on the roads.

Lorry drivers say they have almost abandoned the practice of signaling cars to overtake when the road is clear, because many of the cars took too long to pass. They couldn't be bothered to select a lower gear. The car drivers, after overtaking, slowed down again and hogged the road. Again, a motoring magazine has recently drawn attention to the increasing number of drivers who never wait for gaps. "They manufacture them by force, using their direction indicators as a threat rater than a warning." Punch-ups (打群架) are quite common. It can't be long before we hear of pistols and knives being used.

Driving is essentially a state of mind. However, technically skilled a driver may be, he can't be an advanced motorist if he is always arrogant and aggressive.

Passage Four

On how the world has changed over the last 50 years, not all of it has been good. As you are looking for organic food information, you have obviously become aware that a better alternative exists and you are taking a critical look at the source and production practices of the companies producing the world's food supplies.

The purpose of organic food information is to give you an understanding of what is going into your food. You will see that there are many benefits to organic food that you didn't know before. The basis behind knowing about organic food information is the fact that farmers are resorting to using artificial fertilizers and pesticides (奈虫剂) to control disease and insect attack in order to produce more crops to satisfy growing demand. These artificial fertilizers leave something poisonous in and on the fruit and vegetables we consumes which in turn is absorbed and stored by our bodies.

Even the quality of food has gone down in recent years. Today's fruits have nowhere near the Vitamin C levels they did at one time. However, with organic food information you learn that organic food has fifty percent more nutrients, minerals and vitamins than any other form of produce that has been grown under intensive farming. If you are eating non-organic produce you will have eat more fruit in order to make up for this deficiency. But then the dangerous cycle continues since you will be eating more chemicals that are worse for your health than they are good for you.

Another aspect of organic food information is the production of meat and poultry (家禽). Most only consider produce when it comes to organic food information disregarding the antibiotics and hormones that are given to both cattle and poultry that are being force fed. Ask yourself what happens to all these antibiotics and hormones when the animals is killed, the remaining of these antibiotics and growth hormones resides in the meat which are then consumed, digested and stored in human bodies. There is no way that an animal that isn't kept in healthy conditions can produce healthy food for humans to eat.

You have nothing to lose by trying organic product, not only will it be healthy for you but you will also be able to eat produce and meat the way they are supposed to be. You will likely be so impressed with the taste of organic fruit that you will never return to the mass-produced fruit again. While cost and availability can be a big issue for some, you can do a bit of research online and find a local store that stocks organic produce for a reasonable price.

| 49. | It is stated in Paragraph 1 that organic food |
|-----|---|
| | A. is considered as a better choice |

Passage Five

Drinking wastewater? The idea may sound distasteful, but new federally funded research says more Americans are doing so-whether they know or not-and this reuse will be increasingly necessary as the U.S. population expands.

Treated wastewater poses no greater health risks than existing water supplies and, in some cases, may be even safer to drink, according to a report released by the National Research Council. "We believe water reuse is an option to deal with growing water scarcity, especially in coastally areas," says Jorg Drewes, an engineering professor at the Colorado School of Mines. "This can be done reliably without putting the public at risk," he says, citing technological advances. He says it's a waste not to reuse the nation's wastewater, because almost all of it is treated before discharge. This water includes storm runoff (径流) as well as used water from homes, business and factories.

In many places, the report says, the public does not realize it's drinking water that was treated after being discharged as wastewater somewhere upstream. For example, wastewater discharged into the Trinity River from Dallas/Fort Worth flows south into Lake Livingston, the source for

Houston's drinking water.

Despite the growing importance of this reuse, the report says there's been no systemic analysis of its extent nationwide since a 1980 study by the U.S. Environmental Protection Agency (EPA). Alan Roberson of the American Water Works Association says wastewater reuse is common, so the council's report is import but not surprising. Roberson expects this recycling will continue to increase, especially for irrigation and industrial needs. He says it will take no longer to establish potables (适于饮用的) uses because of public nervousness about drinking wastewater, however treated.

We have to do something to address water scarcity," says Olga Naidenko, a senior scientist at the non-profit Environmental Working Group." Less than 10% of potable water is used for drinking, cooking, showering or dishwashing. We flush it down the toilet, literally." Technologies exist to safely treat the water, she says, although some are expensive.

The report says water reuse projects tend to cost more than most water conservation options but less than sweater desalination (脱盐) and other supply alternatives. It calls on the EAP to develop rules that set safe national standards.

Why do kids hate Brussels sprouts (芽甘蓝)? Because Brussels sprouts are bitter, and kids generally don't like bitter tastes. But it's not their <u>61</u>. Researchers say that a dislike for bitter and sour is a survival instinct, since most toxic substances <u>62</u> that way too. On the other hand, sweetness typically indicates that something is <u>63</u> to eat, so children are born with a <u>63</u> for sweets.

What we like to eat changes over time. As we age, we realize that <u>65</u> something tastes bitter or sour, it won't kill us, and we learn to <u>66</u>. When we're older, we <u>67</u> some of our smell sensitivity. Humans need smell to experience flavor, which is different from taste. With our senses diminished, we'll probably begin <u>68</u> sugar and salt to our food, to heighten the flavor. <u>69</u>, there's a theory that the reason many especially "big"-tasting wines in recent years have won awards is that wine critics are getting older and finding subtle flavors <u>70</u> to sense.

If someone is __71__ to detect flavors at all, he may have a taste __72__, which can be caused by tongue injury or brain damage. Or it could be a problem with __73__. The channel that separately the mouth from the nose allows us to smell behind our nose and is __74__ enjoying most complex flavors. That's why food seems __75__ when we have a stuffy nose-expect chicken noodle soup. It's so salty.

Part I Translation (30 minutes, 20 points, 10 for each section)

Section A

Directions: Translate the following passage into Chinese. Write your translation on the **ANSWER SHEET**.

In many ways the Internet has a very positive effect on society. It has improved communication, simplified handling tasks, offered a huge convenience, enabled faster processing, and provided more options, all of which frees more time to do other things. Yet, interestingly enough, the Internet has in some ways had negative effects. The quality of communication has declined and people are impatient because they have become accustomed to instant satisfaction, and using the Internet also takes up a lot of time.

Section B

Directions: Translate the following passage into English. Write your translation on the ANSWER SHEET.

乔布斯(Steve Jobs)去世后备受敬仰,原因之一是他创造了科技产品的美感。乔布斯认为无论是汽车还是电脑,人们都愿意购买一些比同类产品更为美观的东西,在乔布斯的领导下,从产品外形、材料到使用感受等各个方面,苹果都带来了无与伦比的体验,让人们的生活变得更美了。
