Part I Dialogue Communication

2005 年同等学力申请硕士学位全国统考英语试题 试卷一

试卷一

Section B Dialogue Comprehension

6. Man: I saw John yesterday. You know what? He was driving a luxurious car.

Woman: He rented it. He often makes believe that he is a millionaire.

Question: What does the woman mean?

- A. Everyone believes that John is a millionaire.
- B. John dreams of becoming a millionaire.
- C. John dreams of having a luxurious car.
- D. John pretends to be a millionaire.
- 7. Woman: I can hardly go on. The work is so tough.

Man: Don't lose heart I'll back you up all the time.

Question: What does the man mean?

- A. He will help the woman with her work.
- B. He will support the woman.
- C. He will do the work for the woman.
- D. He will encourage the woman.
- 8. Man: I didn't know you got a promotion why didn't you tell me earlier so that we could have celebrated it?

Woman: I guess it slipped my mind. My mind was lost to other things because of work.

Ouestion: What does the woman mean?

- A. She felt lost with her work.
- B. She had a poor memory.
- C. she forgot to tell him.
- D. She had to go to work.
- 9. Man: The new Chevy Chase film was terrific!

Woman: Oh, come off it, A1. Chevy Chase is a great comedian, but he sure didn't show it in that movie.

Ouestion: What does the woman think of the movie?

- A. It's great comedy.
- B. It's typical Chevy Chase film.
- C. It isn't a good comedy.
- D. It isn't as terrible as A1 thought.
- 10. Woman: You haven't said a word about my dress, Dave. Don't you like it?

Man: I'm sorry I didn't say anything about it sooner. I don't think I've seen anything like is before.

Question: What does the man probably think of the dress?

- A. It is in fashion.
- B. It surely is unique.
- C. It is a bit old-fashioned
- D. It surely suits her

| C. She lost her temp | | |
| D. She didn't know | now to complain | |
| Passage Two | | |
| _ | and culture are fairly mo | dern words, having come into prominent use during |
| | • | $\vec{\xi}$), historians, and literary figures. There has been a |
| • • | | s though they mean the same thing, but they are not |
| the same. | 2 3 | |
| Thus civili | zation, in its most essent | tial meaning, is the ability of people to live together |

mailto:wdg98@263.net

cultivate a garden;

harmoniously in cities, in social groupings......

The word culture is derived from the Latin verb colere, till the soil. But colere also has a wider range of meanings. It may, like civis, mean inhabiting a town or village. But most of its definitions suggest a process of starting and promoting growth and development. One may One of the basic and best-know features of civilization and culture is the presence of tools. But more important than their simple existence is that the tools are always being improved and enlarged upon, a result of creativity. It took thousands of years to get from the first wheel to the latest, most advanced model of automobile.

It is the concept of humans as toolmakers and improvers that differentiates them from other animals. A monkey may use a stick to knock a banana from a tree, but that stick will never, through a monkey's cleverness, be modified into a hook or a ladder.

| 36. What does the author think of the words "civilization", and "culture"? | |
|--|--|
| A. They are identical. | |
| B. They are different concepts. | |
| C. They can often be 1used interchangeable. | |
| D. They are defined differently by different people. | |
| 37. According to the author the word "civilization" originally refers to | |
| A. people's way of life in cities. | |
| B. people's ability to live together in cities. | |
| C. a type of social organizations | |
| D. an advanced level of social life | |
| 38. The Latin verb <i>colere</i> originally means "" | |
| A. live in a city. | |
| B. develop oneself | |
| C. promote growth | |
| D. cultivate the land | |
| 39. The author believes that creativity | |
| A. is a unique feature of civilized beings | |
| B. brings forth the improvement of tools | |
| C. is the result of human development | |
| D. helps the advance of culture | |
| 40. The author mentions monkeys in the last paragraph to show that | |
| A. monkeys are the same as birds | |
| B. people once lived in caves like monkeys | |
| C. monkeys can never develop into human beings | |

D. man is different from other animals such as monkeys

Passage Three

The huge growth of global "ecotourism" industry is becoming an increasing concern for conservationists with mounting evidence that many wild species do not respond well to contact with human beings. overexposure to tourists has been linked to stress, abnormal behavior and adverse health effects in species such as polar bears, dolphins and gorillas(大猩猩), says a report in New Scientist.

While regulated ecotourism can help conservation efforts by encouraging people to manage endangered species and their habitats, many projects are poorly designed and unregulated, its says. "Many ecotourist projects are unaudited, unauthorized and merely hint they are based on environmentally friendly policies and operations"

While regulated ecotourism can help conservation efforts by encouraging people to manage endangered species and their habitats, "many projects are poorly designed and hint they are based on environmentally friendly policies and operations."

Ecotourism is growing by 10 to 30 percent a year and an estimated 20 percent of tourists are thought to visit a conservation-based project. Philip Seddon, of the University of Otago in New Zealand, said that although most tourist projects conformed to basic guidelines on land use and not scaring wildlife, their full impact was rarely considered.

.

In Africa, gorillas have picked up parasites introduced to their habitat by tourists and mongooses(蠓) have caught lung diseases from human beings. Experts said that the answer to the problems was better regulation and supervision of ecotourism. The Galapagos Islands, where visitor numbers are strictly controlled, is a good model.

| 41. Ecotourism is meant to |
|---|
| A. have tourists help in the conservation of wildlife |
| B. have wild species respond well to contact with humans |
| C. make wild species reduce stress and abnormal behavior |
| D. make conservationists more concerned with wildlife |
| B. make conservationists more concerned with whether |
| 42. According to New Scientist, many ecotourist Projects |
| A. really encourage people to protect wildlife and its habit |
| B. strictly follow environmentally friendly polices |
| C. actually lack proper examination and official approval |
| D. seriously damage the habitats of endangered species |
| |
| 43. What will happen to wildlife ultimately if the present "ecotourism" practice goes on? |
| A. It will disturb their life. |
| B. It will affect their health. |
| C. It will increase their stress. |
| D. It will threaten their survival. |
| |
| 44. According to the passage, the growth in the global "ecotourism" industry |
| A. reflects a growing concern for conservation |
| B. arouses a growing concern for conservation |
| C. coincides with a mounting concern for conservation |
| D. originates from a grater concern for conservation |
| 45. According to the passage, a solution to the "ecotourism" problem is to |
| A. encourage people to manage endangered species |
| B. reduce the exposure of wildlife to human beings |

- C. help wild animals increase their fitness
- D. prevent wildlife from catching human disease

Passage Four

Computers can beat chess champion Gary Kasparov at his game, count all the atoms in a nuclear explosion, and calculate complex figures in a fraction of a second, but they still fail at the slight differences in language translation. Artificial Intelligence computers have large amounts of memory, capable of storing huge translating dictionaries and extensive lists of grammar rules. Yet, today's best computer language translators have just a 60 percent accuracy rate. Scientists are still unable to program the computer with human-like common sense reasoning power.

Computer language translation is called Machine Translation, or MT. While not perfect, MT is surprisingly good. MT was designed to process dry, technical language that people find tedious to translate. Computers can translate basic phrases, such as "You foot bone's connected to your ankle bone, your ankle bone's connected to your leg bone." They can translate more difficult phrases, such as "Which witch is which?" Computers can also accurately translate "Wild thing, you make my heart sing!" into other languages because they can understand individual words, as long as the words are pre-programmed in their dictionary.

But highly sensitive types of translating, such as important diplomatic conversations, are beyond the scope of computer translating programs. Human translators use intuitional meaning, not logic, to process words and phrases into other languages. A human can properly translate the phrase, "The pen is in the pen (国养禽畜的圈)," because most humans know that it means that a writing instrument is in a small enclosed space. Many times, computers do not have the ability to determine in which way two identical words in one sentence are to be used.

In addition to using massive rule-programmed machines, computer programmers are also trying to teach computers to learn how to think for themselves through the "experience" of translating. Even with these efforts, programmers admit that a "thinking" computer might not ever be invented in the future.

| 46. | Computers | today are | capable of | _ |
|-----|-----------|-----------|------------|---|
| | | | | |

- A. defeating the best chess player in the world.
- B. telling subtle differences between languages
- C. translating over 60 percent of difficult texts.
- D. doing human-like common sense reasoning
- 47. According to the passage, which of the following is NOT true?
 - A. Computers can translate dry and difficult phrase.
 - B. Computers can understand sensitive language.
 - C. Computers can translate technical language
 - D. Computers can understand pre-programmed word.
- 48. The major problem with computer translating programs is that computers _____
 - A. can not translate illogical sentences
 - B. do not have a large enough capacity of memory
 - C. can not understand grammatical rules

- D. do not have intuition to process language
- 49. To improve machine translation, computer programmers are trying to_____
 - A. use powerful rule-programmed computers
 - B. teach computers to think by practice
 - C. have computers compile translating dictionaries
 - D. add explanations of words in computer programs
- 50. The passage suggests that _____.
 - A. the accuracy rate of machine translation cannot be raised
 - B. it is impossible for computers to think as humans do
 - C. only technical language is suitable for machine translation
 - D. it is impossib1e to determine of identical words

Passage Five

Several years ago during the dot-com passion, Manhattan lawyer John Kennedy sometimes wore a dark blue suit to meet potential Internet clients. But he soon realized that his conservative clothes were a strike against him before he even shook hands. so he began to do business in casual, open-shirt clothes.

But now the tables have turned. Today Silicon Valley executives are the ones often coming out in suits. No wonder that fortune 500 executives are dusting off their silk ties and pants. "I would say there is a trend now toward a little more business dress," said Kennedy. "I find myself wearing suits more."

While there isn't a rush toward formal office wear, clothiers and executives say the workplace uniform is heading that way. In many offices, men are wearing Jackets, ties and pants more frequently than a year age. Top women executives never went as casual as men, so the shift doesn't affect them as dramatically.

"Business casual" took several years to catch on. It started with casual Fridays, evolved to casual summers, then became casual everyday.

Observers mention many factors driving the trend Internet companies helped lead the dress-down movement and other industries followed suit to attract workers. But with the collapse of many dot-coms, the relaxed look is becoming a style to avoid. Moreover, as the economy stumbles, more people are hunting for jobs or trying to keep the ones they have, and appearance counts.

US President Bush wears a coat and tie in the White House office and expects his staff to dress "professionally," which some say sets a tome for the nation.

51. "Business casual" was prevalent several years ago because _____.

- A. the Manhattan law business grew very quickly
- B. shaking hands with clients became popular
- C. the country was fighting the conservatives
- D. the Internet companies boomed then

| 52. When the "business casual" prevailed, |
|---|
| A. businessmen wore ties only in workplace |
| B. businessmen didn't wear ties at all |
| C. businesswomen didn't wear formally in workplace |
| D. businesswomen still wore formally everywhere |
| 52 TI E 500 |
| 53. The Fortune 500 executives |
| A. set the trend toward more casual wear |
| B. are particular about what they wear |
| C. begin to wear suits more often than before |
| D. are usually indifferent to fashion trend |
| 54. At the beginning of the "business casual" trend, business people wore casually |
| A. when meeting clients |
| B. on weekends |
| C. in summer |
| D. almost everyday |
| 55. It is implied in the passage that the change of business dress from the casual to the formal reflects |
| A. the changed of people's taste in fashion |
| B. the ups and downs of the fashion industry |
| C. the ups and downs of the Internet companies |
| D. people's difference in business dress |
| |
| |
| Part IV Cloze |
| The United States has historically had higher rates of marriage than those of other |
| industrialized countries. The current annual marriage $\underline{56}$ in the United Statesabout 9 new |
| marriages for every 1,000 peopleis57 higher than it is in other industrialized countries. |
| However, marriage is <u>58</u> as widespread as it was several decades ago. <u>59</u> of American |
| adults who are married 60 form 72 percent in 1970 to 60 percent In 2002. This does not |
| mean that large numbers of people will remain unmarried 61 their lives. Throughout the |
| 20th century, about 90 percent of Americans married at some 62 in their lives. Experts 63 |
| that about the same proportion of today's young adults will eventually marry. |
| The timing of marriage has varied <u>64</u> over the past century. In 1995 the average age of |

women in the United States at the time of their first marriage was 25. The average age of men was about 27. Men and women in the United States marry for the first time at an average of five years later than people did in the 1950s. <u>65</u>, young adults of the 1950s married younger than did any previous <u>66</u> in U.S. history. Today's later age of marriage is <u>67</u> the age of marriage between 1890 and 1940. Moreover, a greater proportion of the population was married (95 percent) during the 1950s than at any time before <u>68</u>. Experts do not agree on why the "marriage rush" of the late 1940s and 1950s occurred, but most social scientists believe it represented a <u>69</u> to the return of peace full life and prosperity after 15 years of severe

试卷二

英译汉部分

Progress in communication and transport technologies during the 20th century has enabled us to overcome geographical boundaries and revolutionize our way of living. The world is now linked to such an extent that a local happening cannot take place without impacting on the International community.

Globalization is not Just about increasing the worldwide circulation of information and ideas. Economically speaking, It entails transnational investment and international trade, thereby integrating all countries into a single giant world market. In terms of culture, globalization itself is neither positive nor negative: It may be either of them depending on our viewpoint.

汉译英部分

随着我国社会经济的迅猛发展、人们生活水平的提高和医疗卫生事业的改善,我国老年人口明显增多。不少人对此忧心忡忡,但有识之士指出,我们不仅要看到人口老龄化所带来的巨大压力,也要看到人口老龄话背后所蕴涵的商机以及老年人丰富的智力、经验等资源,要将压力变为机遇。

写作

要求:写一篇不少于150字的作文,

关于: Whether College Students Should Be Allowed to Get Married

Outline:

- 1. Choose either of the two positions: College students should (not) be allowed to get married.
- 2. State your reasons for or against the issue
- 3. Conclusion
